

Claims 1-17 (Canceled)

The new Claims are grouped as 18-25, 26-33, 34-37, where Claims 18, 26, and 34 are independent Claims.

18. (New) A computer virus avoidance website including a mock computer virus; and an e-mail system with e-mail users; wherein the computer virus avoidance website provides a list of e-mail addresses of e-mail users; sends an e-mail with the mock computer virus to an e-mail address from the list of e-mail addresses; and creates a first web page list of e-mail users who activate the mock computer virus.
19. (New) The computer virus avoidance website of claim 18, wherein the mock computer virus displays an anti-computer virus message to the e-mail user who activates the mock computer virus.
20. (New) The computer virus avoidance website of claim 18, wherein the computer virus avoidance website further sends an anti-computer virus message e-mail to the e-mail user who activates the mock computer virus.
21. (New) The computer virus avoidance website of claim 18, wherein the computer virus avoidance website further creates a second web page list of e-mail users who do not activate the mock virus and the second web page list of e-mail user is used to reward e-mail users whose behavior may avoid activation of a computer virus.
22. (New) The computer virus avoidance website of claim 18, wherein the mock computer virus sends an e-mail to a preset e-mail address when the mock computer virus is activated.
23. (New) The computer virus avoidance website of claim 18, wherein the first web page list of e-mail user who activate the mock computer virus is used to modify the behavior of e-mail users who may activate a computer virus.
24. (New) The computer virus avoidance website of claim 18, wherein the first web page list of e-mail user who activate the mock computer virus is used

to measure the change in behavior of e-mail users who may activate a computer virus.

25. (New) The computer virus avoidance website of claim 18, wherein the list of e-mail addresses of e-mail users is derived from the directory of e-mail user address of the e-mail system.
26. (New) A mock computer virus; a web site providing a web page list of e-mail address of e-mail users and a web page list of e-mail users who may activate a computer virus; and an e-mail system with e-mail users wherein an e-mail with the mock computer virus is sent to an e-mail user from the web page list of e-mail addresses of e-mail users and when the e-mail user activates the mock computer virus, the e-mail user is added to the web page list of e-mail users who may activate a computer virus.
27. (New) The mock computer virus of claim 26, wherein the mock computer virus displays an anti-computer virus message to the e-mail user when the mock computer virus is activated.
28. (New) The mock computer virus of claim 26, wherein the mock computer virus causes an anti-computer virus message e-mail to be sent to the e-mail user that activates the mock computer virus.
29. (New) The mock computer virus of claim 26, wherein the mock computer virus sends an e-mail to a preset e-mail address when the mock computer virus is activated.
30. (New) The mock computer virus of claim 26, wherein the e-mail user is added to a web page list of e-mail users who may not activate a computer virus when the e-mail user does not activate the mock computer virus and the web page list of e-mail users who may not activate a computer virus is used to reward e-mail users whose behavior may not activate a computer virus.
31. (New) The mock computer virus of claim 26, wherein the web page list of e-mail users who may activate a computer virus is used to modify the behavior of e-mail users who may activate a computer virus.

32. (New) The mock computer virus of claim 26, wherein the web page list of e-mail users who may activate a computer virus is used to measure the change in behavior of e-mail users who may activate a computer virus.
33. (New) The mock computer virus of claim 26, wherein the web page list of e-mail addresses is derived from the directory of e-mail addresses of e-mail users of the e-mail system.
34. (New) A web page list of e-mail users that activate a mock computer virus, a mock computer virus, a web page list of e-mail addresses of e-mail users, and an e-mail system with e-mail users wherein an e-mail with the mock computer virus is sent to an e-mail user from the web page list of e-mail addresses and when the e-mail user activates the mock computer virus, the e-mail user is added to the web page list of e-mail users that activate a mock computer virus.
35. (New) The web page list of e-mail user that activate a mock computer virus of claim 34, wherein the web page list of e-mail users that activate a mock computer virus is used to modify the behavior of e-mail users that may activate a computer virus.
36. (New) The web page list of e-mail users that activate a mock computer virus of claim 34, wherein the web page list of e-mail user that activate a mock computer virus is used to measure the change in behavior of e-mail users that may activate a computer virus.
37. (New) The web page list of e-mail users that activate a mock computer virus of claim 34, wherein a second list of e-mail users who do not activate the mock virus is used to reward e-mail users whose behavior may not activate a computer virus.

32. (New) The mock computer virus of claim 26, wherein the web page list of e-mail users who may activate a computer virus is used to measure the change in behavior of e-mail users who may activate a computer virus.
33. (New) The mock computer virus of claim 26, wherein the web page list of e-mail addresses is derived from the directory of e-mail addresses of e-mail users of the e-mail system.
34. (New) A web page list of e-mail users that activate a mock computer virus, a mock computer virus, a web page list of e-mail addresses of e-mail users, and an e-mail system with e-mail users wherein an e-mail with the mock computer virus is sent to an e-mail user from the web page list of e-mail addresses and when the e-mail user activates the mock computer virus, the e-mail user is added to the web page list of e-mail users that activate a mock computer virus.
35. (New) The web page list of e-mail user that activate a mock computer virus of claim 34, wherein the web page list of e-mail users that activate a mock computer virus is used to modify the behavior of e-mail users that may activate a computer virus.
36. (New) The web page list of e-mail users that activate a mock computer virus of claim 34, wherein the web page list of e-mail user that activate a mock computer virus is used to measure the change in behavior of e-mail users that may activate a computer virus.
37. (New) The web page list of e-mail users that activate a mock computer virus of claim 34, wherein a second list of e-mail users who do not activate the mock virus is used to reward e-mail users whose behavior may not activate a computer virus.
